

# Cookies Policy

## **I. What are cookies and local data storage ("cookies" and similar technologies)?**

"Cookies" are small text files that are downloaded to your computer or mobile device when you visit websites. First-party cookies are those that are determined by the website you are visiting. Third-party cookies are those cookies that are used by domains other than the website you are visiting. Like cookies, local storage technology, if used, allows websites to store information on a computer or mobile device. Local storage is most often persistent and, unlike cookies, data in local storage is not automatically transferred over the internet each time the website that stored it is visited.

## **II. How do we use cookies and similar technologies?**

We use cookies and similar technologies on our Website in order to improve the performance of the respective websites and the user experience.

## **III. Types of cookies:**

Our Website may use the following types of cookies:

### **(1) Essential cookies:**

These cookies are strictly necessary for the website to perform its functions.

We use these cookies, for example, in the following events:

- to authenticate and identify our users when they use our Site so that we can provide our services;
- so that we can fulfill our obligations and maintain the security of our services.

### **(2) Session cookies:**

We may also use session cookies, for example:

- to allow you to move between individual pages of our Site without having to log in again. This practice is known as "single sign-on";
- to recognize you when you return to our Site to use our services.

## **How do we use cookies?**

We use the information from cookies to make our Internet pages more enjoyable and user-friendly for users and to be able to provide you with a personalized experience on our site.

## **IV. How are cookies deleted?**

You can choose for yourself whether to accept cookies or not. If you want to know when your computer receives a cookie, you can set your browser so that it notifies you. This gives you the option to accept or decline a cookie. Your computer can be set to reject all cookies. If you want to find out how to do this, please visit [www.allaboutcookies.org](http://www.allaboutcookies.org). Please note that changes to your browser that disable the cookie feature will prevent parts of our Sites from functioning properly, including the login and playback functions.

## **V. Changes to our Cookies Policy:**

Any future changes to our Cookies Policy will be posted on this page. All changes are effective immediately, except for existing customers, for whom such changes are effective 30 days after they are posted, unless otherwise noted.

**VI. Can website users block cookies?**

Yes, you can change your browser's privacy settings to block all cookies. However, this may seriously affect the functionality of the website and your use of it, as many websites may not function as they should. Your browser may allow you to delete all cookies when you close it. However, this option also deletes persistent cookies that may store your preferences and personalized settings on websites you visit regularly. It is possible to save the cookies you want because your browser may allow you to specify which sites you always allow or which sites you do not allow to use cookies.

**VII. Where can I find more information about cookies?**

Detailed information on how organizations use cookies can be found at: [www.allaboutcookies.org](http://www.allaboutcookies.org).
